

Essential Oils

Essential Oils are useful in the practice of aromatherapy. Essential oil is not actually an oil, but the natural product extracted from the bark, flower, fruit, leaf or root. They deliver positive benefits to the body through smell and direct absorption into the skin. Benefits of essential oil include soothing, calming, stimulating, refreshing, centering, and warming to the system. They are sourced from all over the world in their purest state. Essential Oils are extremely potent and should never be used directly on the skin, as the liquid may cause irritation to the skin.

All of our essential oils are safe for use in soaps, lotions, and personal care products as well as soy, parafin, and beeswax candles.

Anise, Star

Botanical Name: *Illicium Verum*
Extraction: Steam Distillation

Country of Origin: China
Parts Used: Fruit

Star Anise has been used in Chinese medicine over 1300 years due to its stimulating effects against respiratory disorders such as bronchitis and chronic coughing. It is characterized as a pale yellow liquid with a warm, spicy, extremely sweet, licorice-like scent. Having excellent masking properties, Star Anise also blends well with rose, lavender, orange, pine and other spice oils.

Cedarwood Texas White

Botanical Name: *Juniperus Ashei*
Extraction: Steam Distillation

Country of Origin: USA
Parts Used: Heartwood

Cedarwood oil is often used as a healing remedy for skin irritants such as rashes, acne, and oily skin. This oil helps control oily hair, dandruff, and hair loss, all the while cleansing the scalp and hair roots. In an aroma lamp, the essential oil is an effective insect repellent like eucalyptus, geranium, cloves, or cypress. Do not use while pregnant.

Chinese Ginger

Botanical Name: *Zingiber Officinale*
Extraction: Steam Distillation

Country of Origin: China
Parts Used: Root

Ginger has been used as a domestic spice as well as a remedy for thousands of years. Popularly known for its ability to help indigestion, ginger can also be used for treatment of rheumatism, bacterial dysentery, malaria, and motion sickness. Pale yellow to amber in color, this essential oil has a warm, slightly green, fresh, woody-spicy scent that blends well with patchouli, rosewood, cedarwood, coriander, rose, lime, orange and other citrus oils.

Cinnamon Leaf

Botanical Name: *Cinnamomum Zeylanicum*
Extraction: Steam Distillation

Country of Origin: Sri Lanka
Parts Used: Leaves

The cinnamon tree is an evergreen native to China and Vietnam that has since been cultivated in many other regions. It has shiny, leathery green leaves, and small, white flowers with oval shaped purple berries. Cinnamon leaf is believed to have the properties of a stimulant, antiseptic, antibiotic, astringent, carminative, emmenagogue, a natural insecticide and an antispasmodic. Cinnamon has warming properties that help invigorate and rejuvenate the mind and body. Its pungent, spicy aroma supports the respiratory and digestive systems. Cinnamon has been used for centuries in teas, entrees, and baked goods to both increase appetite before a meal and to settle the stomach.

Citronella, Java

Botanical Name: *Cymbopogon Winterianus*
Extraction: Steam Distillation

Country of Origin: Java/Indonesia
Parts Used: Leaves

Java Citronella is an essential oil obtained from the leaves and stems of the cymbopogon plant commonly known as lemongrass. The two active ingredients in citronella, geraniol and citronellol, are both antiseptics having multiple uses in disinfectants, soaps, perfumes, and insect repellants. Java Citronella is famous in Bintan, Indonesia for its use in aroma therapy. Having a sweet, floral aroma, this oil blends well with lavender and tea tree.

Coriander Seed

Botanical Name: *Coriandrum Sativum*
Extraction: Steam Distillation

Country of Origin: Bulgaria
Parts Used: Seeds

A strong aromatic annual herb which grows to approximately three feet in height. Coriander has large bright green leaves and umbels of small white or light pink flowers. The seeds are round and consist of two pericarps with a warm pleasant odor. The top note is a sweet-woody scent. The body note is spicy, aromatic, and sweet with a candy-like floral balsamic undertone. The dry-out is a lingering, dry, sweet-woody note. This essential oil is relaxing and gentle.

Eucalyptus

Botanical Name: *Eucalyptus Globulus*
Extraction: Steam Distillation

Country of Origin: China
Parts Used: Leaves

Aroma is fresh, cooling, energizing, and deodorizing. Use in a diffuser to freshen, 2-3 drops to a bowl of hot water to inhale the fragrant steam or use it in the sauna/steam bath. For scenting body care products use 5-10 drops per ounce. Blends well with most herbs, such as lavender, rosemary, and others. Both western and eastern medicine have used eucalyptus for its support of the respiratory system for cough and throat medicine and chest ointments. Never ingest eucalyptus for its support of the respiratory system for cough and throat medicine and chest ointments. Never ingest eucalyptus; it is very toxic orally. Keep away from children.

Lavandin Grosso

Botanical Name: *Lavandula Intermedia var Grosso* Country of Origin: France
Extraction: Steam Distillation Parts Used: Flower

Lavandin Grosso is used as an herbaceous scent with effective uses against respiratory problems and headaches. Commonly compared with lavender, lavandin grosso has a clear light yellow color with a strong, somewhat sharp camphor smell with light, floral undertones. This oil should be avoided during pregnancy and by those with epilepsy.

Lavender 40/42

Botanical Name: *Cymbopogon Winterianus* Country of Origin: Java/Indonesia
Extraction: Steam Distillation Parts Used: Leaves

This magnificent bouquet contains Italian, Bulgarian and French lavenders. Aroma is floral, herbaceous, fresh, and light with balsamic woody undertones. Uses include analgesic, anticonvulsant, antidepressant, antimicrobial, anti-rheumatic, antiseptic, antitoxic, decongestant, deodorant, diuretic, fungicide, and sedative. Lavender brings down high blood pressure, relieves insomnia, muscular spasms and rheumatic pains. Excellent for relief of pain from sunburn and minor burns and keeps insects away. One of the safest for use with children and the elderly. The 40/42 refers to the standardization of both linalool and linalyl acetate resulting in a very consistent floral scent. Blends well with most oils, especially citrus.

Lemon, California

Botanical Name: *Citrus Limon* Country of Origin: USA
Extraction: Cold Pressed Parts Used: Lemon Peel

Light, fresh citrus scent. Because of its color, and its warm, cheerful energy some people call lemon essential oil the "sunshine oil". Its aroma clears the mind and inspires new energy. Thought to be a cure all by the ancient Egyptians, today it is known as an effective astringent. Uses include adding a few drops to a diffuser to freshen the aroma of a home, added to detergent to wash dishes or clean. Keep away from direct sunlight or heat and store in sealed containers. Store in refrigerator to maintain freshness.

Lemongrass

Botanical Name: *Cymbopogon Citratus*
Extraction: Steam Distillation

Country of Origin: Guatemala
Parts Used: Leaves

Lemongrass is a fast growing, tall aromatic perennial grass that grows up to five feet in height. Native to Asia, lemongrass is now mostly cultivated in the West Indies, Africa, and Tropical Asia. Lemongrass is known for its invigorating and antiseptic properties. An excellent anti-depressant, this oil tones and fortifies the nervous system which can be used in the bath for soothing muscular nerves and pains.

Litsea Cubeba

Botanical Name: *Litsea Cubeba*
Extraction: Steam Distilled

Country of Origin: China
Parts Used: Fruit

Also known as May Chang, this oil is derived from a small tropical and fragrant tree. The oil is extracted from the fruit which looks like a small pepper. Litsea Cubeba oil is commonly used in skin toners as it is an effective tool in the fight against acne and excessive perspiration. Another common use for Litsea oil is in soaps and lotions as it tends to be a scent fixative when used with other more volatile oils such as lemon or orange. Litsea Cubeba is also a wonderful oil to add to an aromatherapy diffuser as it not only scents the surrounding air beautifully, but it disinfects as well.

Patchouli

Botanical Name: *Pogostemon Cablin*
Extraction: Steam Distillation

Country of Origin: Indonesia
Parts Used: Leaves

Patchouli is one of the few oils that improves with age. Patchouli can help to relieve stress related ailments such as insomnia, headaches, anxiety and depression. The oil's earthy fragrance, which is often used as a perfume, can help keep in touch with the physical self. Patchouli helps stimulate the mind by focusing thoughts and improving concentration.

Pink Grapefruit

Botanical Name: *Citrus Racemosa*
Extraction: Cold Pressed

Country of Origin: France
Parts Used: Peel

Pink grapefruit essential oil is believed by aroma therapists to be a spiritual up-lifter that eases muscle fatigue and stiffness. It is also a purifier of congested oily and acne prone skin. Grapefruit oil can also be added to creams and lotions as a natural toner. Some believe that pink grapefruit can also be used to stimulate hair growth though there is no medical documentation verifying this theory.

Rosemary, Spanish

Botanical Name: *Rosmarinus Officinalis*
Extraction: Steam Distillation

Country of Origin: Spain
Parts Used: Leaves

An aromatic shrub, *Rosmarinus Officinalis* has scaly bark and dense leathery needlelike leaves with tiny pale blue blossoms. Reaching almost six feet in height, rosemary can be used to stimulate skin cells, improve dry or mature skin, ease wrinkles, heal burns and wounds, and clear acne by regulating oil secretions and fighting bacteria that clog pores. The mental benefits of this oil include a caffeine like effect that combats mental fatigue and sluggishness as well as enhance mental clarity aiding in alertness and concentration.

Siberian Fir Needle

Botanical Name: *Abies Sibirica*
Extraction: Steam Distillation

Country of Origin: Siberia
Parts Used: Leaves

Siberian Fir Needle oil is the most popular fir needle oil in both Europe and the United States due to its sweet, crisp aroma. This oil is soothing to muscle aches and joint conditions like rheumatism and gout as well as used in cough and cold remedies. Siberian fir needle oil can be combined with eucalyptus, rosemary, tea tree, or peppermint.

Spruce

Botanical Name: *Tsuga Canadensis*
Extraction: Steam Distillation

Country of Origin: Canada
Parts Used: Leaves

Spruce has a pleasing green forest scent that is both calming and elevating. Often added to other pine or fir oils in air fresheners, disinfectants, detergents, and soaps, spruce helps support the respiratory, nervous, and glandular systems. Its aromatic influences help open and release emotional stress, creating a feeling of balance throughout the body.

Tangerine

Botanical Name: *Citrus Reticulata*
Extraction: Cold Pressed

Country of Origin: Italy
Parts Used: Peel

The name tangerine comes from Tangier, Morocco, the port from which the first tangerines were shipped to Europe in 1841. Tangerine essential oil, like most of the citrus family, has refreshing and rejuvenating characteristics that help thought process and emotional confusion. Aroma therapists consider tangerine to be very comforting, soothing and warming. Users may also see tangerine used in perfumes, soaps, and as an antispasmodic, carminative, digestive, diuretic, sedative, stimulant, and tonic agent.

Wintergreen, Natural

Botanical Name: *Gaultheria Procumbens*

Country of Origin: India

Extraction: Steam Distillation

Parts Used: Leaves

Wintergreen is a small evergreen herb that grows up to six inches high with slender stems, leathery serrated leaves, drooping white flowers and fleshy scarlet berries. Wintergreen has been used as a pain reliever for many years, and also is believed to increase the speed of healing for skin disorders. When added to lotions, wintergreen acts as a natural moisturizer leaving skin feeling young and supple.

White Grapefruit

Botanical Name: *Citrus Paradisi*

Country of Origin: China

Extraction: Cold Pressed

Parts Used: Peel

White grapefruit shares the nutritional qualities of many other citrus fruits, with high contents of vitamin C and protection against infectious illness. Having a crisp citrusy scent, white grapefruit can also be used to combat cellulite and muscle fatigue. This scent blends well with bergamot, lavender, lime, and tea tree.
