

# Fragrance Oils

Fragrances are made from a blend of oils, some more volatile than others which in turn create a change in aroma during evaporation. These fragrance oils are divided into the top note, the middle notes or body, and the bottom or end note, which consists mainly of less volatile compounds. Like a great piece of music, the blend must be in harmony to achieve a master scent. Our Candle & Soap Scents fragrance line is made with these same principles in mind making our products unique and beyond typical. They are meant to be enjoyed!

**All of our fragrances are safe for use in soaps, lotions, and personal care products as well as soy, parafin, and beeswax candles.**

Pricing subject to change without notice. Always check the website for current pricing
