

Stephenson Liquid Crystal Suspension Body Wash Tutorial

The Liquid Crystal Suspension Body Wash base is an incredibly easy, ready-to-use body wash/shampoo base to use. You can easily customize it to suit your needs with your choice of color, fragrance and a variety of additives.

Supplies and Equipment Needed

Large spoon or butter knife for stirring
Rubber gloves
Large glass measuring bowl
Measuring spoons
4 oz PET Bullet Bottles
20/410 Black Disc Caps
Liquid Crystal Suspension Body Wash
Jojoba spheres in electric blue
White Citrus BBW Type Fragrance Oil
Gel colors of your choice

Optional Equipment:

Microwave

Funnel

Small glass measuring cups with spouts

IMPORTANT TIPS:

- It's important to ensure that everything is properly clean and disinfected. I ran what I could through the sterilization option on my dishwasher. I also wiped down everything with alcohol and let dry completely before starting.
- Each fragrance will react differently in the base. Important: Test your formula in small quantities first to ensure you are achieving your desired outcome.

*This tutorial makes a **16 oz batch** of Body Wash.*

Step 1: Measure out **16 ounces** of the Liquid Crystal Suspension Body Wash into a glass-measuring cup.

Step 2: This step is optional: You can warm the base for better incorporation of your fragrance and to make it easier to pour into bottles. If you choose to warm the base, place your container

into a microwave and heat for 30 seconds then stir. Do not boil or overheat! 30 seconds is sufficient.

Step 3: Add $\frac{1}{2}$ **teaspoon** of White Citrus BBW Type Fragrance oil to your container and stir slowly until fully incorporated.
You can add .5 - 1% fragrance to your base. Be careful that you don't add too much fragrance oil otherwise your product will become too thin.

0.5% = $\frac{1}{2}$ **teaspoon** per 16 ounces of base.

Step 4: To customize your products further, you can get creative by adding different additives and colors. Here I add $\frac{1}{4}$ teaspoon of Electric Blue Jojoba Spheres to my body wash. Stir slowly until evenly suspended.

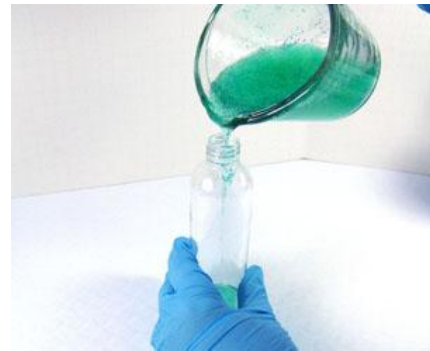

Step 5: To make pouring easier, pour about 4 ounces into a smaller glass container that has a spout and pour slowly into your 4 oz PET Bullet Bottles. If you have a small funnel available, this would make it even easier, but not necessary.

Step 6: To further customize your base, let's add some color! You can make each bottle a different color or all the same. To make each a different color, pour about 4 ounces of your remaining body wash into separate pouring containers and add **1 drop** of a Gel Colorant of your choice and stir slowly. Follow **Step 5** to pour into your bottles.

If your bubbles are not white, then too much color has been added to the formula. To be safe, use only 1 drop of gel color per 4 ounces of body wash.

Step 7: Cool product with the top off of the bottle to prevent condensation. Product will re-thicken upon cooling. Enjoy!
